INTRODUCTION

This report gives final figures from the 1971 Census on labour market activity. Table 29 includes persons 15 years and over, who worked since January 1, 1970, classified by detailed occupation and sex, showing (a) current labour force activity and (b) weeks worked in 1970, for provinces. Table 30 consists of unemployed persons 15 years and over, by occupation major groups and sex, for census metropolitan areas.

Space and printing considerations necessitate the use of occupational codes rather than titles in Table 29. For the unit group titles corresponding to these 4-digit codes, see Appendix report, Catalogue No. 94-784.

In the 1971 Census, labour force refers to non-inmates 15 years and over, who, in the week prior to enumeration, worked for pay or profit, helped without pay in a family business or farm, looked for work, were on temporary lay-off, or had jobs from which they were temporarily absent because of illness, vacation, strike, etc. Persons doing housework in their own home or volunteer work only, are excluded from the labour force. Also excluded are female farm workers who indicated that they helped without pay in a family farm or business for less than 20 hours. It should be noted that there are indications that the labour force counts for Quebec may be somewhat underestimated due to response problems. Further information regarding the labour force counts is available in the Population and Housing Research Memorandum (PH-EC-4) "Background Information on the 1971 Census Labour Force Data". This paper can be obtained on request from the Census User Inquiry Service.

In 1971 for most areas the self-enumeration method of collecting data replaced the canvasser approach. Basic data on the labour force were collected from every third household for persons 15 years and over from the following question:

31(a) How many hours did you work for pay or profit last week?

- (b) Last week, how many hours did you help without pay in the operation of a family business or farm?
- (c) Did you look for work last week?
- (d) Last week did you have a job from which you were on temporary lay-off?
- (e) Last week did you have a job or business from which you were absent because of illness, vacation, strike, training course, etc.?

Comparability with earlier censuses: In the 1971 Census the term "labour force activity" was used for the first time. It replaces the term employment status (employed, unemployed and not in the labour force) used in 1951 and 1961.

In 1961, labour force activity was confined to information on persons with a job or, if none, looking for work, in the week prior to enumeration. Persons on temporary lay-off were to be included in the latter group. Some evidence exists that enumerators incorrectly included some of those on temporary lay-off in the group "with a job last week". Other problems of non-comparability with the 1971 data may exist due to the use of different questions, and methodology (self-enumeration vs. canvasser).

In addition, it should be noted that the 1971 occupational classification differs considerably from previous ones. It is the result of a complete revision of earlier classifications. Consequently, comparisons with earlier censuses cannot be made at this time.

Comparability with the Labour Force Survey: The Labour Force Survey is inclusive of 14-year olds and exclusive of residents of the Yukon and Northwest Territories, Indians on reserves, members of the Armed Forces, overseas households and inmates of institutions. Though the underlying labour force concepts used in the 1971 Census and the monthly survey were designed to be as consistent as possible the above differences in coverage plus different methodology, questions and operational procedures result in some loss of comparability of data. Further information on the comparison of Census and Labour Force Survey data is available in the introductory report to this volume (Catalogue No. 94-771) or in the Population and Housing Research Memorandum (PH-EC-4) previously referenced.

Ce bulletin présente les chiffres définitifs du recensement de 1971 en ce qui concerne l'activité sur le marché du travail. Le tableau 29 indique les personnes de 15 ans et plus qui ont travaillé depuis le 1^{er} janvier 1970, selon la profession et le sexe, par a) activité et b) nombre de semaines travaillées en 1970, pour les provinces. Le tableau 30 indique les chômeurs de 15 ans et plus, selon le grand groupe professionnel et le sexe, pour les régions métropolitaines de recensement.

Des considérations d'espace et d'impression ont nécessité l'utilisation de codes de professions plutôt que des titres au tableau 29. Pour les titres des groupes de base correspondant aux codes de professions à quatre chiffres, voir Appendice, n° 94-784 au catalogue.

Au recensement de 1971, la population active comprend les non-pensionnaires d'institution de 15 ans et plus qui, au cours de la semaine précédant le dénombrement, ont travaillé contre rémunération ou en vue d'un bénéfice ou sans rémunération dans une entreprise ou une ferme familiale, ont cherché du travail, étaient en congédiement temporaire ou avaient un emploi dont ils étaient temporairement absents à cause d'une maladie, de vacances, d'une grève, etc. Les personnes faisant seulement des travaux ménagers chez elles ou du travail bénévole sont exclues de la population active. Sont également exclues les travailleuses agricoles qui ont indiqué avoir travaillé moins de 20 heures sans rémunération dans une ferme ou une entreprise familiale. Il est à noter que, suivant certaines indications, la population active du Québec est peut-être quelque peu sous-estimée, en raison de certaines difficultés d'interprétation. On trouvera de plus amples renseignements concernant les chiffres de la population active dans une Note de recherche sur la population et le logement (PH-EC-4) intitulée "Étude des données du recensement de 1971 sur la population active". Cette note de recherche peut être obtenue sur demande au Service-utilisateurs du recensement.

En 1971, dans la plupart des régions, le recensement par représentant a fait place à l'autodénombrement. Les données de base sur la population active ont été recueillies auprès d'un tiers des ménages pour les personnes de 15 ans et plus, qui devaient répondre à la question suivante:

31(a) Combien d'heures avez-vous travaillé la semaine dernière contre rémunération ou en vue d'un bénéfice?

- (b) La semaine dernière combien d'heures avez-vous aidé sans rémunération à l'exploitation d'une entreprise ou d'une ferme familiale?
- (c) Avez-vous cherché du travail la semaine dernière?
- (d) La semaine dernière aviez-vous un emploi dont vous aviez été congédié temporairement?
- (e) La semaine dernière aviez-vous un emploi ou une entreprise dont vous étiez absent à cause de maladie, de vacances, d'une grève, d'un cours de formation, etc.?

Comparabilité avec les recensements antérieurs: Au recensement de 1971, le terme "activité" a été utilisé pour la première fois. Il remplace la désignation "état d'emploi" (employé, chômeur ou inactif) utilisée en 1951 et 1961.

En 1961, les données sur l'activité se limitaient aux personnes ayant un emploi ou cherchant du travail la semaine précédant le dénombrement. Les personnes en congédiement temporaire étaient comprises dans ce dernier groupe. Selon certains indices, des agents recenseurs ont erronément inclus certaines personnes en congédiement temporaire dans le groupe de celles qui avaient un emploi la semaine précédente. D'autres problèmes de non-comparabilité avec les données de 1971 peuvent exister en raison de la différence des questions et de la différence de méthodologie (autodénombrement contre recensement par représentant).

Par ailleurs, il faut noter que la classification des professions de 1971 diffère grandement des classifications précédentes. Elle est le produit d'une révision complète des anciennes classifications. Par conséquent, il est impossible de faire des comparaisons avec les recensements antérieurs pour l'instant.

Comparabilité avec l'enquête sur la population active: L'enquête sur la population active englobe les personnes de 14 ans, mais ne tient pas compte des résidents du Yukon et des Territoires du Nord-Ouest, des Indiens dans les réserves, des membres des Forces armées, des ménages outre-mer ni des pensionnaires d'institution. Les concepts fondamentaux d'activité utilisés au recensement de 1971 et dans l'enquête mensuelle se veulent aussi convergents que possible, mais les différences de champ d'observation mentionnées ci-dessus et les différences de méthodologie, de questions et de procédure réduisent la comparabilité des données. On peut obtenir plus de renseignements sur la comparaison des données du recensement et de l'enquête sur la population active dans l'introduction de ce volume (n° 94-771 au catalogue) ou dans la Note de recherche sur la population et le logement (PH-EC-4) citée plus haut.

INTRODUCTION – Concluded – fin

The information in this report was collected on a 33 1/3% sample basis. Information on the sample and the weighting system can be found in the introductory report to this volume (see Catalogue No. 94-771).

The 1971 Census figures in this report have been subjected to a confidentiality procedure to prevent the possibility of associating small figures with any identifiable individual. The particular technique used is known as "random rounding". Under this method, all last or "unit" digits in a table (including all totals) are randomly rounded (either up or down) to "0" or "5". This technique provides the strongest possible protection against direct, residual, or negative disclosures without adding any significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census reports.

DEFINITIONS

Census Metropolitan Area (CMA): The main labour market of a continuous built-up area having 100,000 population or more.

Labour force activity: Refers to the labour market activity of persons 15 years and over in the week prior to enumeration, i.e. working for pay or profit or in unpaid family work, looking for work, on temporary lay-off, or with a job but not at work.

Employed labour force: Refers to all non-inmates 15 years and over, who, during the week prior to enumeration, worked for pay or profit, or in unpaid family work. It also includes persons who had a job from which they were temporarily absent, because of illness, vacation, strike, etc. (provided they were not also looking for work).

Unemployed labour force: The unemployed consists of all non-inmates 15 years and over, who, during the week prior to enumeration, were not working but were looking for work, or were on temporary lay-off, or would have been looking for work except that they were temporarily ill, or believed no suitable work was available in the community.

Not in the labour force: Refers to all persons 15 years and over not classified as members of the labour force. Most persons in this category are students, housewives, retired workers, seasonal workers in an "off" season who are not looking for work, and persons who cannot work because of long-term physical or mental illness or disability, including inmates of institutions.

Weeks worked in 1970: Refers to the number of weeks in 1970 during which the respondent worked even for a few hours. Includes weeks of paid vacation or sick leave or paid absence on training courses. "Work" implies work for "pay or profit", self-employment, unpaid family work on family farm or business, and work for payment "in kind" in a non-family enterprise.

Weeks worked in 1970, full-time or part-time: Persons who worked in 1970 were asked to report whether the weeks reported were mainly full weeks of work or mainly weeks in which they worked only part of a week. (Persons working only one day a week were instructed to mark "Part-time".) Persons with a part-time job for part of the year and a full-time job for another part of the year were to report the information for the job at which they worked the most weeks. Full-time work was defined as work for the full work week for the normal work hours.

Occupation: Refers to the specific kind of work the person did on the job, as determined by the reporting of the kind of work, the description of the most important duties and the job title. Data relate to the respondent's job in the week prior to enumeration if he or she had a job during that week or to the job of longest duration since January 1, 1970 if not employed in that week. Persons with two or more jobs during the reference week were asked to give the information for the one at which they worked the most hours.

For information on the occupational classification, see "Occupational Classification Manual, Census of Canada, 1971", Volume I, Catalogue No. 12-536.

The estimates of the mean square error for the characteristics covered in this report were not available at the time of publication. They will be available in the introductory report to this volume (Catalogue No. 94-771). Those users requiring this information prior to the release of the introductory report should contact the Census User Inquiry Service.

Les renseignements de la présente publication ont été recueillis sur un échantillon de 33 1/3 %. On trouvera des renseignements sur l'échantillon et le système de pondération dans l'introduction de ce volume (voir la publication n° 94-771 au catalogue).

Par souci de confidentialité, les chiffres du recensement de 1971 publiés ici ont été soumis à une formule qui interdit la possibilité d'associer des chiffres de faible importance à une personne reconnaissable. Cette technique particulière s'appelle l'"arrondissement aléatoire". Grâce à cette méthode, tous les derniers chiffres, c'est-à-dire les chiffres des unités (y compris tous les totaux) des tableaux sont arrondis de façon aléatoire (vers le haut ou vers le bas) à "0" ou à "5". Cette technique assure la protection maximale contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De plus, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences.

DÉFINITIONS

Région métropolitaine de recensement (R.M.R.): Principal marché du travail d'une zone bâtie en continu comptant 100,000 habitants et plus.

Activité: Activité sur le marché du travail des personnes de 15 ans et plus au cours de la semaine précédant le dénombrement (travaillant contre rémunération ou en vue d'un bénéfice, ou sans rémunération dans une entreprise familiale, cherchant du travail, en congédiement temporaire, ou ayant un emploi mais n'étant pas au travail).

Population active occupée: Tous les non-pensionnaires d'institution de 15 ans et plus qui, au cours de la semaine précédant le dénombrement, ont travaillé contre rémunération ou en vue d'un bénéfice, ou sans rémunération dans une entreprise familiale, ou avaient un emploi dont ils étaient temporairement absents à cause d'une maladie, de vacances, d'une grève, etc. (pourvu qu'ils n'aient pas également cherché du travail).

Population active en chômage: Tous les non-pensionnaires d'institution de 15 ans et plus qui, au cours de la semaine précédant le dénombrement, ne travaillaient pas mais cherchaient du travail, ou étaient en congédiement temporaire, ou auraient cherché du travail s'ils n'avaient pas été temporairement malades, ou s'ils n'avaient pas été convaincus qu'il n'y avait pas de travail convenable disponible dans la localité.

Inactifs: Toutes les personnes de 15 ans et plus qui ne font pas partie de la population active. La plupart des personnes de cette catégorie sont des étudiants, des maîtresses de maison, des retraités, des travailleurs saisonniers recensés en saison morte et ne cherchant pas de travail, ou des personnes qui ne peuvent travailler en raison d'une maladie ou d'une infirmité physique ou mentale de longue durée, y compris les pensionnaires d'institution.

Semaines travaillées en 1970: Nombre de semaines au cours desquelles le recensé a travaillé, ne fût-ce que quelques heures, en 1970. Sont comprises les semaines de vacances payées, de congé de maladie ou d'absences payées pour des cours de formation. "Travail" s'entend du travail "contre rémunération ou en vue d'un bénéfice", d'un emploi autonome, du travail sans rémunération dans une ferme ou une entreprise familiale ainsi que du travail contre paiement en nature dans une entreprise non familiale.

Semaines travaillées en 1970, à plein temps ou à temps partiel: Les personnes qui ont travaillé en 1970 devaient indiquer si leurs semaines de travail étaient surtout des semaines entières ou surtout des semaines partielles. (Les personnes qui n'avaient travaillé qu'une journée par semaine devaient indiquer "à temps partiel".) Les personnes qui avaient un emploi à temps partiel pendant une partie de l'année et un emploi à plein temps pendant l'autre partie devaient répondre pour l'emploi qu'elles avaient occupé le plus grand nombre de semaines. Travailler à plein temps, selon la définition, c'est travailler une semaine complète pour le nombre normal d'heures de travail.

Profession: Genre de travail que faisait le recensé déterminé par l'indication du genre de travail, la description des fonctions principales et le titre de l'emploi. Les données portent sur l'emploi que le recensé occupait pendant la semaine précédant le dénombrement, s'il avait un emploi cette semaine-là, ou sur l'emploi de plus longue durée depuis le 1^{er} janvier 1970, s'il n'avait pas d'emploi cette semaine-là. Les personnes ayant deux emplois ou plus pendant la semaine de référence devaient fournir les renseignements pour celui auquel elles avaient consacré le plus grand nombre d'heures.

Pour des renseignements sur la classification des professions, voir "La classification des professions, Recensement du Canada, 1971", volume I (n° 12-536F au catalogue).

Les estimations de l'erreur quadratique moyenne des caractéristiques données dans ce bulletin n'étaient pas connues au moment de la publication. Elles seront disponibles dans l'introduction de ce volume (n° 94-771 au catalogue). Les utilisateurs désireux de connaître ce renseignement avant la publication du bulletin d'introduction devront s'adresser au Service-utilisateurs du recensement.

Other forms of publication

In addition to the tabulated results of the 1971 Census published in reports and bulletins, a large number of tables will be issued to users as copies of computer print-outs. These will also be available in microform. A variety of statistical tables may be purchased on computer "summary" tapes for further computer analysis by users. Details of the content, prices, and availability of census tabulations in these output media may be obtained from the User Inquiry Service, Census Field, Statistics Canada, Ottawa K1A 0T7.

Special tabulations

To the extent that confidentiality constraints permit, Statistics Canada will produce for users at cost, special tabulations not already included in the planned tabulation programme. Requests should be sent to the Census User Inquiry Service specifying clearly the precise classifications or cross-classifications and the geographic areas. The exact categories for each characteristic and a rough table layout should be included.

Maps and geographic files

Large-scale maps may be purchased to show the boundaries of enumeration areas (i.e., the territory covered by each Census Representative in taking the census), as well as small-scale maps of census divisions and other statistical areas. Supporting documentation relating to the census geographic files (i.e., place names, codes, etc.) are available in tabular form identifying the component enumeration areas of administrative and statistical units (e.g., towns, villages, municipalities, tracts). Further details, including costs to users, may be obtained from the User Inquiry Service of the Census Field of Statistics Canada.
